Release Notes - RemCapture 2.1

Introduction

Symbol Remote Capture (RemCapture) is a PC application that enables the user to capture the changes to the registry and file system of a connected Symbol mobile computer. By capturing the registry and file system changes and saving them to a non-volatile location, these changes can persist a cold boot of the device.

Although RemCapture has been designed to work with all Symbol mobile computers running Windows Mobile 5.0, Windows Mobile 6.0, Windows Mobile 6.1, Windows Mobile 6.5, Windows CE 5.0, Windows CE 6.0 and Windows Embedded Compact 7, it should only be used with approved devices.

What's New

1. Rebranded as Symbol Technologies LLC. As part of rebranding:
   - Help files updated with the Symbol copyright message, and all reference to company name.
   - Installation updated with the Symbol EULA.
   - Version information of all binaries modified to include Symbol copyright message.

Contents
